About us

Company **JSC AKADAS** was established in 1993 by Mr Aloyzas Vitas in Zarasai city. Our main products are: wooden outdoor furniture, cushions, doors, windows, and other wooden products.

We started from simple wooden products like ladders and wood sidings and now we are one of the largest outdoor furniture factory in the Baltic States. Our 25 years experience and continuous investment in production enable us to implement both large orders and smaller projects while maintaining the best price, quality, and customer service relationship.

Outdoor furniture is a seasonal product, for this we have over 24,000 m2 space to store our products. This provide us flexibility to offer our products to customer during the peak season.

From the pine log to the final packed product - the whole production process in one place, ensures the highest quality.

All of our products are made from responsive and environmentally friendly raw materials. We use pine wood in production. To our customers we are able to offer products made from certified pine wood by request. Our products are painted with non-toxic water-based paints. Our painting technologies and high quality raw materials make it possible to offer our customers durable products.

Our goal - to become the strongest manufacturer of outdoor furniture in Europe.

Our vision - strong, reliable and high product quality company that works in accordance with the principles of respect and understanding.

Our mission - provide the user with a comfortable and qualitative rest, and for the trader to improve feedback with the user.

HANNA

OTHER FABRICS, COLORS OR PATTERNS ARE AVAILABLE BY REQUEST !

WINDOWS AND DOORS

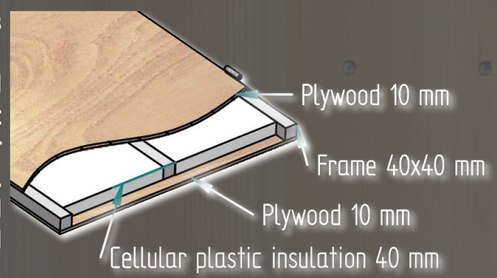

The most recent product in our range is classic Scandinavian type windows and doors.

Outward opening wooden windows are made based on Scandinavian technology and Nordic experience.
Although these windows are very popular in the Scandinavian countries, they are becoming more and more interesting for customers from other countries due to their simplicity and uniqueness. We can offer wooden, painted or unpainted different types of windows with different thickness of glass packets and traditional Scandinavian type fittings and locks. In our assortment we have not opening (fast), round, half-round, double and triple casements side-hung, as well as top-hung windows, in different sizes, so each customer can find the most suitable option according to his individual needs and requirements. Nordic weather conditions and time-tested Scandinavian windows are a great choice for building both lightweight structures and residential houses.

We produce Scandinavian outdoor doors of various sizes in different models.
Outdoor doors are made of premium pine wood and plywood. We use polystyrene for door filler. Our current equipment allows us to offer for our customers various door designs, with and without glass, different sizes and shapes. Proven cold Scandinavian winter, our manufactured doors are a great choice for anyone looking for a good price-quality ratio.

NATURAL MATERIAL:

Our products are made of solid pine wood using over 25 years of experience in garden furniture production.

Pine is a natural material and therefore may be affected by changes in the weather conditions. High temperature and low humidity periods outside can cause shrinkage, cracks, splits of some components or resin release. Larger sections of timber will be splitting more but this not affects its structural stability of the product. These processes cannot be avoided. To reduce or eliminate such processes we sort out material very carefully and use water based 3 layer coating technologies to ensure maximum protection outdoor. Our maintenance and proper use instructions will show to final customer how to keep our products durable for a long time.

Our products is a strong choice for your patio, garden or balcony. Simple yet robust constructions, high quality materials and clasical design makes our products durable and nice part of your garden.

All what is left

the Pleasure to rest!
